## **The Magic Plant!**

The aloe vera plant has been used for centuries. The ancient Egyptians called it the "immortal plant" and in ancient Greece it was called the "magic plant". The unique gel of the aloe vera plant is known for the variety of nutrients it contains such as vitamins, minerals, fatty acids and amino acids, as well as enzymes and natural antioxidants such as: zinc, selenium, vitamins A, B, C and more. In recent years, many of the positive and varied properties and effects of aloe vera gel on humans have been studied and it has been found that most of these properties and effects are attributed to a unique polysaccharide called Acemannan.
